

# Forum for Social Economics

**Editor-in-Chief:**

**John Marangos, Ph.D.**, Associate Professor, Department of Economics,  
University of Crete, Greece

**Description:**

Sponsored by the Association for Social Economics, The Forum for Social Economics applies social economic analysis to practical policy issues and the implications of alternative policy perspectives concerning the social economy. Papers contribute to our understanding of past or current socioeconomic issues that have contemporary relevance for economists, social scientists, policymakers, and business professionals.

This journal publishes work that addresses economic issues within the context of the wider ethical, cultural, and natural environment. Papers often transcend established disciplinary boundaries. In addition, the journal explores issues relevant to the teaching of economics, with an emphasis on approaches to teaching social and heterodox economics.

The "Explorations in Social Economics" section, a feature of the journal, publishes alternative views on emerging issues written by distinguished scholars.

**Associate Editor:**

**Mark D. White**, Department of Political Science, Economics, and Philosophy, College of Staten Island/CUNY, Staten Island, NY, USA

### Aims and scope

The Forum for Social Economics is an international journal sponsored by the Association for Social Economics. For 35 years the Forum has published high quality peer-reviewed papers. The primary focus of the Forum is on applying social economic analysis to practical policy issues and/or the implications of alternative policy perspectives encompassing the social economy. The Forum is a pluralistic journal publishing work that addresses economic issues within wider ethical, cultural or natural environmental contexts, and is sympathetic to papers that transcend established disciplinary boundaries. Papers should make a contribution to past or current socioeconomic issues that have contemporary relevance to economists, social scientists, policy makers and business. The journal welcomes stimulating original

articles that are clearly written and draw upon contemporary policy-related research. Preference is given to non-technical articles of topical and historical interest that will appeal to a wide range of readers. The journal is also interested in serving as an avenue for issues regarding teaching economics, in particular teaching approaches to social and heterodox economics.

Papers will pass a double-blind referee process supervised and subject to the final approval of the Editor. The „Explorations in Social Economics“ section of the journal is an informative solicited opinion piece by a distinguished scholar presenting alternative views on emerging issues.

The Forum invites graduate students to submit research papers. Proof of graduate student status should be provided with the submission. While the students' papers will go through the regular review process and be held to the same standards for acceptance as other submissions, the panel of reviewers will serve a mentoring role to advise the student to strengthen the paper.
