From the Cayman Islands and the Isle of Man to the Principality of Liechtenstein and the state of Delaware, tax havens offer lower tax rates, less stringent regulations and enforcement, and promises of strict secrecy to individuals and corporations alike. In recent years government regulators, hoping to remedy economic crisis by diverting capital from hidden channels back into taxable view, have undertaken sustained and serious efforts to force tax havens into compliance.

In *Tax Havens*, Ronen Palan, Richard Murphy, and Christian Chavagneux provide an up-to-date evaluation of the role and function of tax havens in the global financial system—their history, inner workings, impact, extent, and enforcement. They make clear that while, individually, tax havens may appear insignificant, together they have a major impact on the global economy. Holding up to $13 trillion of personal wealth—the equivalent of the annual U.S. Gross National Product—and serving as the legal home of two million corporate entities and half of all international lending banks, tax havens also skew the distribution of globalization’s costs and benefits to the detriment of developing economies.

The first comprehensive account of these entities, this book challenges much of the conventional wisdom about tax havens. The authors reveal that, rather than operating at the margins of the world economy, tax havens are integral to it. More than simple conduits for tax avoidance and evasion, tax havens actually belong to the broad world of finance, to the business of managing the monetary resources of individuals, organizations, and countries. They have become among the most powerful instruments of globalization, one of the principal causes of global financial instability, and one of the large political issues of our times.

“This book is an invaluable guide to the lightly studied subject of tax ha-
vens. Clearly written and thoroughly researched, it vividly demonstrates
how central the scattered archipelago of so-called Preferential Tax Re-
gimes is to the operation of contemporary global finance. Tax Havens be-
longs on the shelf of every specialist in the international political economy
of money.”
