Written by one of the foremost experts on the business cycle, this is a compelling and engaging explanation of how and why the economic downturn of 2007 became the Great Recession of 2008 and 2009.

Author Howard Sherman explores the root causes of the cycle of boom and bust of the economy, focusing on the 2008 financial crisis and the Great Recession of 2008-2009. He makes a powerful argument that recessions and the resulting painful involuntary unemployment are inherent in capitalism itself. Sherman clearly illustrates the mechanisms of business cycles, and he provides a thoughtful alternative that would rein in their destructive effects.

“An important book that should be read by everyone concerned about our unstable economy. It is hard hitting and clear, provocative and compelling and it is written by one of the world’s premier teacher-scientists.”

—William M. Dugger, *The University of Tulsa*

“Roller-Coaster Economy builds insightfully from Sherman’s lifetime of work to explain the crisis and to develop constructive ‘public options’ for creating a democratic economy as we regroup amid the current rubble. **Sherman’s writing is also lively and accessible to anyone who wants to understand—and do something to change—today’s economic reality.”**

—Robert Pollin, *University of Massachusetts-Amherst*
