1st ever

**Green Economics Conference
in Venice, Italy**

in the beautiful setting of

Venice International University- San Servolo Island, Venice, Italy.

April 23rd and 24th 25th 2010

GREENING THE ECONOMY

This is the first ever Green Economics Conference in Italy. The Green Economics Institute is very active in Italy this year, writing books for the Italian Government, and also providing events in several parts of Italy from the Italian Alps down to the Sicilian area. Venice is particularly hard hit by climate change and this conference is an attempt to provide solutions that various parts of Italy are experiencing under global environmental change. We had our own delegation to the Copenhagen Climate Conference and will be going to the COP16 Mexico Summit and the conference will prepare ideas to take to Mexico. The conference will also focus on Green Economics and Green Jobs and a Green New Deal.

Climate change

The Green Economics Institute has been lucky enough to lead a delegation to the Copenhagen Conference on climate change. Assessing how Kyoto has worked up to now and suggestions for changes and for the next few years. How will businesses have to adapt? What are the solutions to food and fuel issues? What are the implications of climate change and sea level rise for the economy of Venice? What can we learn from the experience and case study of Venice?

Subjects the conference will cover amongst others:

Legal Aspects of Environmental Law and climate change implications, gender equity, environmental science, costs of climate change, costs of biodiversity loss, how to assess a project from an environmental point of view, environmental impact assessment, The Green New Deal, switching to renewable energies, energy security and availability, Global Institutional issues and governance, Global corporation and corporate social responsibility, whole life costing, water management, water scarcity, Hydro electric power, eco taxes, carbon taxes, lower carbon economies, poverty, equity, aid, international trade and development, slow travel and green transport, green accounting, resource management, green procurement, development economics, recycling. How to run a green economy. Gender and environmental and social justice discourses.

It will discuss Green solutions to the global financial crisis, the global ecological crisis, the global biodiversity crisis and the climate crisis, green construction and green planning issues, and green tourism.

It will also introduce and explain the different strands of environmental, and green economics newly emerging disciplines in economics

What is green economics? Progress towards a definition

As a fast moving, visionary and topical field, it is always necessary to continue to ask this fundamental question; something orthodox economics fails to do, which has led to the distortion of its aims and its disjointedness with the real world.

So what are the latest research findings and discussions on this topic?

Heterodox and Pluralist Economics Streams

Dr Arturo Herman "The Role of Policy Co-ordination in Fostering Sustainable Development". Green Economics Institute and University of Rome

Professor Jack Reardon Economics USA Hamline University, writer and editor of recent book with Routledge on Pluralism in Economics

Gender and Green Jobs and Climate Change Stream

Green Building Streams

David Muir Resources Economics and Green Buildings Green Economics Institute

Luca Bergo, "Greening the building sector". Italian architect based in Milan with a long experience in green buildings, such as "La Casa Ecologica", a 53 apartment building in Milan, and the new twin towers of the 400 rooms Hotel at Milan Fair.

Consultant of the main agency of the Italian Ministry of Labour's Agency for ecological buildings, for a project promoting craftsmanship, small industries and tourism sectors toward a more sustainable production and behaviour.

This conference is part of the world's leading conference series in green economics. Internationally-renowned composite, multidisciplinary scientists, economists, campaigners, policy makers and directors, professors, social scientists and researchers from all over the globe continue to attend this very popular series, to present their frontier research findings and to keep up to date with latest achievements and developments in this fast moving, leading, and topical field.

Green economics views the current downturn as a clash between ecology and economy and argues that the commodity instability is a symptom of the exhaustion of natural resources. The markets are correctly reflecting that and are indicating that traditional economics instruments and derivatives are no longer working, and new methods of creating a natural economics of abundance need to be urgently developed.

The world has changed and green economics is a school of economics that is comfortable with long termism, equity, climate issues, biodiversity costs and poverty prevention. Green economics has been waiting to take on the mantle and that time has now arrived!

We look forward to welcoming you to Venice, one of the most beautiful cities in the world with its famous, outstanding and atmospheric conference facilities, excellent travel connections and accommodation.

Speakers include:

Prof. Ignazio Musu President and Director of Venice International University, Italy specialist in climate change and sustainable development

Michele Gale USA, Chicago and Brazil

Jampel D'Angelo Development specialist University of Rome

This conference will be run with members of the TEN Centre

The Center for Thematic Environmental Networks (TEN) is a Center for education and research in the fields of environment and sustainable development.

TEN Center promotes the exchange of knowledge and information on the environmental field and offers tools and supplementary approaches in order to solve environmental issues with specific reference to sustainable development.

TEN Center

1. promotes education and advanced training programs on sustainable development and environmental management;
2. develops research activities on the main areas of environmental protection, with specific focus on developing countries;
3. hosts initiatives which provide a meeting platform for the competent authorities, researchers and those who are involved in environmental and sustainable development issues.

Since 2003, TEN manages and coordinates advanced training programs devised for director generals and managers of public administrations, researchers and private sector experts from the People's Republic of China and Eastern European countries. The aim is to augment and improve the capabilities of policy-makers and to facilitate knowledge transfer in order to promote sustainable environmental, social and economic policies.

Since 2002, TEN has also coordinated an EU-endorsed research network on themes regarding contaminated sediments (SedNet); the goal is to identify guidelines to deal with the problem using modern technologies and coordinating studies in European Union countries.

Registration fees

Day 1 Thursday 22nd April 2010 £40 or E45 per person for the evening
Day 2 Friday 23rd April 2010 £200 or E230 per person per day
Day 3 Saturday 24th April 2010 £200 or E230 per person per day

Conference Papers and Proceedings:

High quality Conference Proceedings will be provided to all fully paid up conference participants on arrival at the conference to use throughout the conference. All speakers are invited to send in paper for the proceedings. Papers must be between 800 words- 6000 words in .odt or .doc format. They must be fully referenced in Harvard Referencing format and not contain footnotes. They can be in English or Italian but it is preferred that if they are in Italian they are accompanied by an English translation where possible.

All papers will be submitted to the International Journal of Green Economics for double blind peer review for potential inclusion in a special issue resulting from the conference and featuring Italy, if they are within 2000-7000 words and fully referenced. We are still accepting papers- please email us in the first instance to check if your idea can we incorporated in the programme.
